

YASH AMBARRAJ BAGAL

Backend Engineer — Java / Spring Boot & AI-Integrated Systems

Dhule, Maharashtra, India | +91 8793741648 | yashbagal623@gmail.com | [linkedin.com/in/yashbagal666](https://www.linkedin.com/in/yashbagal666) | github.com/yash1648 | yashbagalportfolio.vercel.app

PROFESSIONAL SUMMARY

Backend engineer focused on Java and Spring Boot — building REST APIs and microservices with Spring Security, Spring Data JPA, and Hibernate ORM on PostgreSQL/MySQL. Extends that backend foundation into AI-integrated systems, using Rust and locally hosted Ollama models to build tools that run without cloud dependency. Comfortable across the stack when a project calls for it, and an active open-source contributor.

TECHNICAL SKILLS

Languages: Java, Rust, Python, TypeScript, JavaScript, SQL, C++

Backend: Spring Boot, Spring Data JPA, Spring Security, Hibernate ORM, Node.js, Express.js, REST APIs, WebSocket, Microservices, JWT Authentication

Frontend: React, JavaFX, Android (native)

Databases: PostgreSQL, MySQL, MongoDB, Redis

AI Tools: Ollama, Whisper.cpp, Piper-TTS, local LLM inference / NLP

Dev Tools: Docker, Git, GitHub Actions, Maven, Postman, Linux

WORK EXPERIENCE

Full Stack Developer Trainee — Slytherin EduTech Pvt. Ltd. (Remote)

Aug 2024 – Jan 2025

- Engineered and deployed modular REST APIs in Java and Spring Boot, applying JWT authentication and role-based access control to secure endpoints across multiple services.
- Built data persistence layers with Spring Data JPA and Hibernate ORM; contributed to sprint planning and peer code reviews within an Agile team.

Software Development Intern — Arcelor Private Limited (Remote)

Jun 2023 – Jul 2023

- Developed backend APIs in PHP for internal business dashboards, handling core business logic and MySQL-based data operations for reporting.

TECHNICAL PROJECTS

PR Review Bot | Python, GitHub API, Ollama

2025

- Built an automated code-review bot to cut down manual PR review effort, combining static heuristic checks (secret detection, null checks) with contextual analysis from a locally hosted Ollama model.
- Wired it into GitHub webhooks to trigger on PR open/update/reopen events and publish structured review comments directly on the PR, with no cloud LLM calls involved.

FinTrack AI | Spring Boot, React, JavaFX, Android, Ollama, WebSocket

2025

- Designed a multi-platform personal finance system — React web, JavaFX desktop, and native Android clients — served by a single Spring Boot backend API.
- Used a locally hosted Ollama model to generate financial insights on-device and WebSocket connections for real-time budget monitoring and alerts.

AeroShare | Rust

2025

- Built a zero-config LAN file transfer tool in Rust with automatic peer discovery, enabling direct file transfers at full network speed with no internet or cloud dependency.

Daily Diary AI | Java, Spring Boot, PostgreSQL, NLP

2025

- Built a journaling backend that applies NLP to detect mood and emotional tone in entries, with encrypted storage and cloud sync for cross-device access.

EDUCATION

B.Tech, Computer Engineering — R. C. Patel Institute of Technology, Shirpur

2025 – Present

Diploma, Computer Engineering — Nikam Institute of Technology, Dhule (89% — First Class w/ Distinction, Rank 1)

2021 – 2024

CERTIFICATIONS

IBM Java Developer Specialization — IBM • Issued Mar 2026 • ID: M14P3UKWFGNO

Rust Fundamentals — Duke University • Issued Jun 2026 • ID: RAAB9CDJZDKI

5-Day AI Agents Intensive Course with Google — Kaggle • Issued Dec 2025
